Re: Action by CPUC - 310 & 909 area codes

RECEIVED

FEDERAL COMMUNICATIONS COMMISSION
WASHINGTON, D.C. 20541

Dear Chairman:

The proposed action by the California Public Utilities Commission (CPUC) would create a hardship for my family and myself. Listed below are the wireless numbers that we possess and use in one of the affected area codes.

Most burdensome would be my business number **909-319-0230** which I use for international business (I am Global Marketing Manager for a company based in Sweden) on a daily basis. This number is listed in printed directories throughout Europe and Scandinavia, in addition to North America. Taking away my telephone number would require me to spend scarce resources printing new marketing materials, business cards, stationary, and use my time notifying business contacts throughout North America and the world. *This is lost time I can not afford in a down economy!*

Another number of mine, **909-214-1854**, is listed as the primary contact for a consulting business that is new and growing. Changing this would require me – again – to spend precious hours creating new letterhead and contacting potential clients, causing confusion among people I have contacted in the hopes of providing professional services. That can't help my business!

Finally, the other two numbers – **909-24-1449** and **909-499-5164** – are used daily by my daughter and wife. And there is simply no reason why we should be burdened with a government taking of these! The CPUC can and should assign NEW wireless numbers to a new area code or overlay system. Please help keep their grubby hands off of my numbers.

Sincerely,

A handwritten signature in black ink, appearing to read 'MJB', with a stylized flourish at the end.

Michael J Billings
Marketing Manager
